EXECUTIVE COMMUNICATION

Thomas Usrey Northrop Grumman 16765 W. Bernardo Dr. San Diego, CA 92127

Dear Mr. Usrey,

Thank you for allowing us to work with you for our Senior Project. We appreciate the time you have spent on meeting and organizing this project with us. The project you proposed to us allowed us to learn about project management, implementation, and your guidance has allowed us to learn what is required to complete a project for a real customer. We hope you continue to host projects for the Project Management Course at Cal State San Marcos, and we all appreciate the experience we shared together.

The final phase of the project ensures the requirements for the Workflow Diagram Widget were met to the best of our abilities, implemented the core functionality of the Shop Floor Visualization, and Scheduling was not successfully completed due to time constraints.

So far, Phase V has a total cost of 4,321.00 and the overall project has a completion cost of 17,052.00.

If you have any questions or concerns regarding the project, please do not hesitate to contact us via email or Slack.

Sincerely,

Matthew Affa Project Lead

solidprojectcsusm@gmail.com

CC: Dr. Shaun-Inn Wu

Stakeholder Approval

I _______(print), approve the current project and continuation under the predetermined terms by The Solid Project team, will provide any non-confidential materials that contributes to the overall success of the project, and will allow The Solid Project team to manage all deliverables set by the project sponsor.

Team Summary

DEVELOPERS

SUMMARY & SKILLS

Crystele Dierickx
Project Manager
Developer

I am a senior at Cal State University of San Marcos pursuing a Bachelor's of Science in Computer Information Systems with an interest in Cybersecurity. I currently work for a software firm that uses artificial intelligence, algorithmic science, and machine learning for endpoint security. The Project Management and Coordinating skills I acquired during my internship and current employer will help me manage our project as well as develop.

Henry Vu Software Developer

Senior pursuing a Bachelor's of Science in Computer Information System at Cal State San Marcos. Worked for Asus Computers as a Computer Technician before being promoted to Data Analyst. I moved to Murrieta after transferring to CSUSM. Previously interned for a startup doing quality assurance.

Matthew Affa Project Lead / Developer

Graduating senior at Cal State San Marcos with a Bachelor's of Science in Computer Information Systems with a minor in Business. I am currently employed at a FinTech company called AppTech in Carlsbad that specializes in Payment and Information technology.

Victor ZavalaSoftware Developer

I am a senior student at California State University San Marcos pursuing a Bachelor's degree in Computer Science with a concentration in Information Systems, which I anticipate earning in May of 2018. I am currently working part-time at Fabian Leadership Resources as a full stack web developer.

Team Norms and Expectations

- Be professional, responsible and punctual.
- All team members are expected to be present at all team meetings.
- Business casual for all meetings with customer.
- Be respectful, honest, and open about team members' issues and concerns.
- Encourage response and feedback.
- Critical decision making should be made by majority vote.
- Clearly articulate the desired outcome.
- Clearly identify constraints and boundaries.
- All costs associated with the project will be split evenly among team members.
- o General communication will be made through Slack.
- All tasks are scheduled and managed through Trello.
- All work must be uploaded to Github.
- All work submitted must be on time and has to meet high quality standards.

Application Development

Business Context

Northrop Grumman is an American global aerospace and defense technology company. They develop integrated Communications, Navigation and Identification systems for tactical aircraft, covert communications and tactical radio systems for the Department of Defense and other national security clients. Their product development involves mechanical, electrical, software, and engineering.

Business Problem

Northrop Grumman works on multiple projects that vary in size across multiple organizations. As they continue to grow ,leaders are required to manage more projects and more people. The company currently uses homegrown workflow applications and data management solutions to manage their processes and need a software solution for collecting, analyzing, controlling data. Northrop Grumman would like to standardize their

workflow and bring more interactive visualizations to increase tool efficiency while maintaining the best user experience for workflow, layout, and scheduling (Gantt).

Project Proposal

We propose a Web-based workflow visualization tool using a widget. This widget will be styled using CSS and have the functionalities that include adding multiple workflow objects, altering / adding workflow status, and displaying capabilities within Northrop Grumman's supported browsers.

Statement of Deliverables

- Working widget will be able to take in JSON information and display it in a workflow diagram.
- Widget will be dynamic so user can add (including insert), remove, edit and update existing workflow states.
- Workflow widget will have new features such as admin mode, zoom, node collapse/expansion, and have a new theme with custom options.
- Second working widget will display a visual representation of the Northrop Grumman manufacturing shop floor.
- Widget will work on IE11+, Firefox 45+, and on Edge.
- Documentation
- Source Code

What form or medium will your deliveries be in:

Executable source code customer can run on their local machine via web browser (IE+11, Firefox 45+, and Edge)

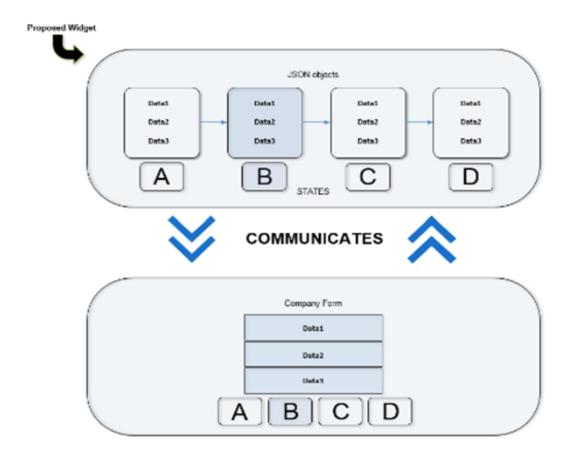

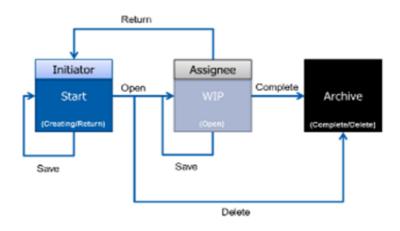

Project Measures of Success Outline

Phase	<u>Details</u>
1	 Hold JAD1 meeting on site at. 2/8/18 Discuss communication method. Discuss the customer's problem. Define project scope and requirements. Request source code from previous group. Set up tools for project. Slack for communication. Google Drive for documentation. Trello for task management. Github for development platform.
2	 Research & Review Vortek Solutions documents and source code. Hold JAD2 meeting on site. Discuss issues and concerns. Confirm project requirements. Review Report 1. Finalize Report 1.
3	 Download and Run Vortek Solutions source code Implement Admin Interface Prototype. Finalize Report 2. Hold Prototype 1 meeting on site. Present admin interface prototype. Get feedback. Discuss briefly next phase of the project. Make changes to admin interface prototype if needed.
4	 Implement different themes for workflow diagram. Finalize Report 3. Hold Prototype 2 meeting on site. Present themes for workflow diagram prototype. Get feedback. Discuss briefly next phase of the project. Make changes to workflow diagram prototype if needed.
5	 Implement shop floor visualization. Thorough testing of all functionalities. Finalize Report 4. Present final product.

Visual Representation

Requirements Matrix

Requirement #	Requirement Description	Task ID	Implemente d (Yes/No)
R1	Widgets will run on IE 11+.	57	YES
R2	Widgets will run on Firefox 45+.	57	YES
R3	Widgets will run on Edge.	57	YES
R4	Workflow widget will receive JSON data from source, including incomplete data. Must save in the same format as received.	57	YES
R5	Widget will render data in a workflow diagram.	57	YES
R6	Workflow widget will be interactive to the browser.	54	YES
R7	Widget will display a Shop Floor Visualization.	67	YES
R8	Workflow widget will self contain D3 object.	57	YES
R9	Workflow widget theme can be styled with CSS.	53	YES
R10	Workflow widget will have an admin mode (edit, insert node, add branch)	57	YES
R11	Workflow widget will have zoom feature	55	YES
R12	Workflow widget will have node collapse/expand feature	54	YES
R13	Shop Floor Visualization widget will render JSON data	67	YES
R14	Shop Floor Visualization will run on IE +11, Edge, and Firefox	67	YES

Product Breakdown Structure

Work Breakdown Structure

Statement of Deliverables

Deliverables	Due Dates
Report 1	2/20/2018
Report 2	3/6/2018
Prototype 1	3/15/2018
Report 3	4/3/2018
Prototype 2	4/12/2018
Report 4	4/24/2018

Other Deliverables due on 5/15/2018

- 1. SRS
- 2. Documented Code
- 3. User Documentation
- 4. Working Examples

Outline of Resources

What resources we will need from Northrop Grumman:

- They have provided us with the following material:
 - 1. Vortek Solutions Source Code
 - 2. Project Presentation
- Timely feedback on requirements clarification and approval.
- Northrop Grumman will no not provide is with access to their network and production data.

What resources we need from the Instructor:

- The instructor needs to give us access to a group server for database, development, and testing.
- Timely response on questions regarding project and guidance.

What resources will TSP: The Solid Project supply:

- Open source software that is needed for development and research purposes
- Github Repository
- Testing environment to show the widget in production
- All research and developed material will be given to Northrop Grumman

Recommendation for Future Development

- Workflow Widget should not be restricted to a certain amount of distance between nodes.
- ShopFloor Nodes should be customizable in shape and size
- ShopFloor Nodes should have the ability to group or collect together
- Implement Delete Node for Shop Floor Visualization Widget
- Add Zoom for Shop Floor Visualization Widget
- Admin Restrictions for dragging nodes for Shop Floor Visualization Widget

Gantt Chart of Major Phases
